Impacted TSI:	TAP
State:	Submitted
Headline:	Creation of ChangeOfTrackMessage message and linked elements
Type:	Enhancement
Last Modification Date:	23 mars 2012 14:58:22
Reference Baseline Release:	TSI TAP ERA/REC/04-2010/INT
Documents and References:	EG2 study of 14/12/2011 (common CER-EIM) Description in RU/IM Implementation Guide
Recognised Organisation:	CER
Submission Date:	23 mars 2012 10:52:24
Endorsed by the following Recognised Organisation(s):	
Submitter Reference Number:	
Project Information:	New optional message proposed to permit to SM to inform their clients if the planned track in station has changed (according to BP 4.2.12)
Problem/Need	
Problem/Need Description:	BP 4.2.12 requires the SM (provided from the RU or the IM) to inform the clients about changes of track. However, B.30 does not propose a message to fulfill this requirement.
Doc_for_pb_description	
Solution Proposal by Submitter	
Solution Proposal by Submitter:	Therefore a new optional message is proposed to permit to SM to inform their clients if the planned track in station has changed (according to BP 4.2.12). The same message can be used to inform about the actual track, even if no planned track has been communicated. The message requires the creation of two new elements: - LocationPlannedTrack - LocationActualTrack Message and new elements are described in joined document.
