

# CR TELEM00000128 - ClearQuest Record Details

23 mars 2012 15:08:17

<b>Main</b>	
Impacted TSI:	TAP
State:	Submitted
Headline:	Creation of TrainJourneyModificationMessage message and linked elements
Type:	Enhancement
Last Modification Date:	23 mars 2012 15:07:44
Reference Baseline Release:	TSI TAP ERA/REC/04-2010/INT
Documents and References:	EG2 study of 14/12/2011 (common CER-EIM) Description in RU/IM Implementation Guide
Recognised Organisation:	CER
Submission Date:	23 mars 2012 14:08:44
Endorsed by the following Recognised Organisation(s):	
Submitter Reference Number:	
Project Information:	New optional message proposed to permit to SM and RU to be informed of journey modifications (rerouting, full or partial cancellation, retiming) so that they can inform their clients (according to BP 4.2.12 and 4.2.13)
<b>Problem/Need</b>	
Problem/Need Description:	BP 4.2.12 and 4.2.13 require the SM (provided from the RU or the IM) and the RU to inform the clients in stations and in trains about deviations from plan (rerouting, full or partial cancellation, retiming). However, B.30 does not propose a message to fulfill this requirement.
Doc_for_pb_description	
<b>Solution Proposal by Submitter</b>	
Solution Proposal by Submitter:	Therefore a new optional message is proposed to permit to SM and RU to inform their clients about deviations from plan (according to BP 4.2.12 and 4.2.13).  The message requires the creation of two new elements: - TrainJourneyModificationIndicator - ModificationStatusIndicator  And two new complex elements: - LocationModified - TrainJourneyModification  Message and new elements are described in joined document.
